Marisa Kirisame

Research

MemBalancer Worked at controlling the garbage collector for V8, the Javascript engine behind Chrome. Achieved 16% reduction in memory use, work being upstreamed into Chrome and Firefox.

DTR Developed an algorithm for gradient checkpointing for large machine learning model. Currently upstreaming to Pytorch. Adopted by Megengine, DELTA, and used in production.

TVM Top 20 contributor to high performance ML compiler-runtime. Contributed to the design of Relay, a higher order, differentiable IR. Implemented Algebraic Data Types, Automatic Differentiation, Reference, Pretty Printing, Ahead-Of-Time Compiler, Partial Evaluator, contributed to Type Inference.

Education

2020– **PhD in CS**, *University of Utah*, Salt Lake City

2019–2020 **Master in CS**, *University of Washington*, Seattle

2015–2019 **Bachelor in CS**, *University of Washington*, Seattle

Publications

[1] Marisa Kirisame, Pranav Shenoy, and Pavel Panchekha. Optimal heap limits for reducing browser memory use. In *OOPSLA*, 2022.

[2] Marisa Kirisame, Steven Lyubomirsky, Altan Haan, Jennifer Brennan, Mike He, Jared Roesch, Tianqi Chen, and Zachary Tatlock. Dynamic tensor rematerialization. In *ICLR*, 2021.

Projects

7Tree Using CEGIS and Ltac's logical programming capability, build a push-button program synthesizer and verifier for a domain specific problem in Coq.

Happy-Tree A polytypic decision tree in Haskell that work on any True-Sums-Of-Products.

Ordinary A small web game to teach programming. Used Functional Reactive Programming, Nix, Zipper, and GHCJS.

PE Simply Typed Lambda Calculus with reference/product/sum with Bidirectional Type Checking, Partial Evaluation, Automatic Differentiation. Written in MetaOCaml so it can be compiled to OCaml.

Prover An automated theorem prover for first order logic that use Gentzen's Sequent Calculus. Logic Formula represented as Generalized Algebraic Data Type using TMP in C++.

Language Fluent in Mandarin, Cantonese, and English.

Coursework

- Programming Languages
- Advanced Computer Architecture
- Graduate Theoretical Computer Science
- Artificial Intelligence
- Operating Systems
- Database
- Systems for Machine Learning
- Deep Learning
