

# Marisa Kirisame

✉ [mkirisame@cs.utah.edu](mailto:mkirisame@cs.utah.edu)

🌐 [www.marisa.moe](http://www.marisa.moe)

🌐 <https://github.com/MarisaKirisame/>

## Education

- 2020–2021 **PHD**, *University of Utah*, Salt Lake City.  
2019–2020 **Master**, *University of Washington*, Seattle.  
2015–2019 **Bachelor**, *University of Washington*, Seattle.

## Experience

- 2020–2021 **CPU**, *Utah*, PHD Researcher.  
2015–2019 **PLSE**, *Seattle*, Undergraduate Researcher.  
Worked on TVM at junior/senior.  
Worked on Cassius(<https://cassius.uwplse.org/>) and Verdi(<http://verdi.uwplse.org/>) at freshman.

## Publications

- [1] Marisa Kirisame, Steven Lyubomirsky, Altan Haan, Jennifer Brennan, Mike He, Jared Roesch, Tianqi Chen, and Zachary Tatlock. Dynamic tensor rematerialization. In *International Conference on Learning Representations*, 2021.
- [2] Jared Roesch, Steven Lyubomirsky, Marisa Kirisame, Josh Pollock, Logan Weber, Ziheng Jiang, Tianqi Chen, Thierry Moreau, and Zachary Tatlock. Relay: A high-level IR for deep learning. *CoRR*, abs/1904.08368, 2019.

## Projects

- TVM Top 20 contributor. Contributed to the design of Relay, a higher order, differentiable IR. Implemented Algebraic Data Types, Automatic Differentiation, Reference, Pretty Printing, Ahead-Of-Time Compiler, Partial Evaluator, contributed to Type Inference.
- DTR An algorithm for gradient checkpointing. Currently upstreaming to pytorch.
- Happy-Tree A polytypic decision tree in Haskell that work on any True-Sums-Of-Products.
- Ordinary A small web game to teach programming. Used Functional Reactive Programming, Nix, Zipper, and GHCJS.
- PE Simply Typed Lambda Calculus with reference/product/sum with Bidirectional Type Checking, Partial Evaluation, Automatic Differentiation. Written in MetaOCaml so it can be compiled to OCaml.
- Astraea Apply equality saturation to CompCert, a verified C compiler in Coq.
- Prover An automated theorem prover for first order logic that use Gentzen's Sequent Calculus. Logic Formula represented as Generalized Algebraic Data Type using Template Metaprogramming in C++.
- AI Implemented multiple search algorithms in AI Modern Approach, Including A Star, Bidirectional Breath First Search, Constraint Satisfaction Programming with K Arch Consistency optimization. Heavily used Iterator Style and Boost to increase efficiency.

## Coursework

- Programming Languages, Deep Learning
- Advanced Computer Architecture
- Graduate Theoretical Computer Science
- Operating Systems
- Database
- Systems for Machine Learning
